

FAST FLOORING

THE FUTURE OF INSTALLATION

creating better environments

forbo

FLOORING SYSTEMS

INSTALL AND WALK ON THE SAME DAY!

The future of flooring installation has arrived and it's **fast** and **adhesive free!** Forbo's family of **Fast Flooring** solutions are adhesive free floor coverings, which are quick and easy to install whilst also being sustainable due to their re-usable and/or recyclable nature.

- Quick turnaround with minimal disruption
- No noise, odours or unnecessary closure of areas
- Floors can be walked on immediately
- Easy to remove and replace, without subfloor damage
- Available in a large choice of formats, designs and adhesive free installation methods

Developed as a **portfolio** to help overcome various commercial project challenges, from **problematic subfloors** to **demanding project timescales**, this brochure provides you with a clear overview of Forbo's Fast Flooring offer and is designed to help you choose **which product is right for you** and your project requirements.

SAVE MONEY

SAVE TIME

RECYCLE

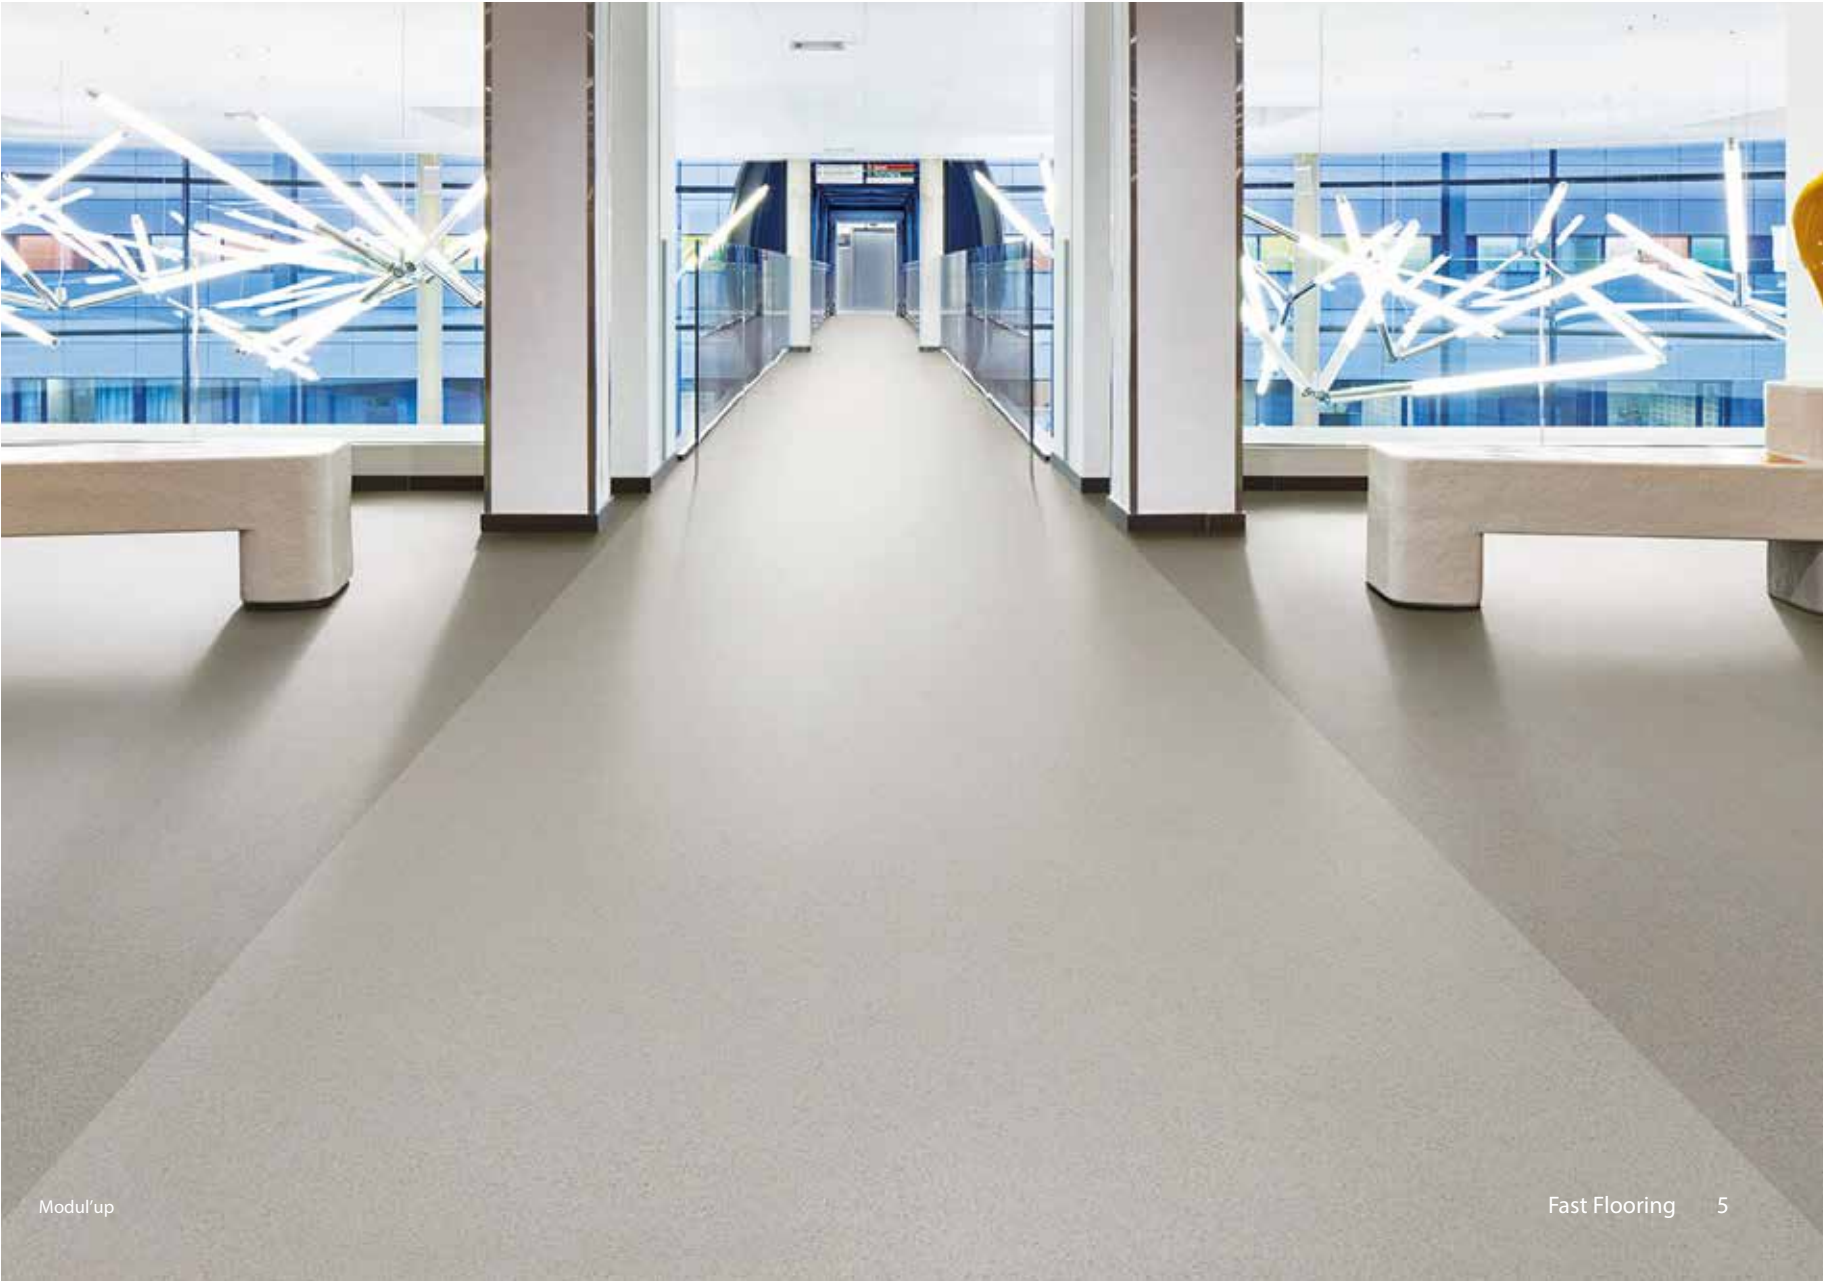

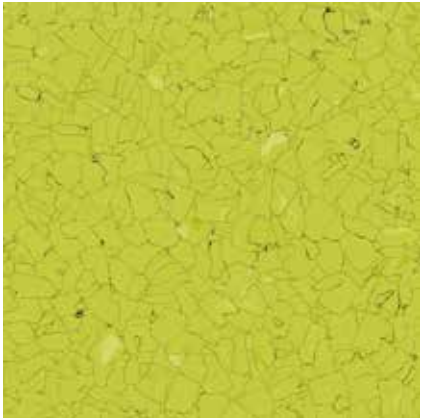

WHY CHOOSE FORBO'S FAST FLOORING?

Forbo's **multi award-winning** Fast Flooring solutions have already been installed across many **retail, healthcare, education** and **office** projects. Whether it's sheet, tile or plank the portfolio offers **maximum flexibility** by providing a number of **formats** and installation options, from **interlocking** (click and dovetail) to **adhesive free** to innovative **single or double-sided tape**.

Use our **'help to choose'** table to identify the best solution for your next project. We've also added **QR codes** to each of our products outlined within the brochure, so you can view the colourways available and find all the technical data and installation information you need.

To see our Fast Flooring in action simply refer to our case studies featured at the back of this brochure.

SUSTAINABILITY AND CIRCULARITY

Eliminating the use of adhesive means, that at the end of their service life, the adhesive free floor coverings can be **easily removed**, and many are immediately **ready for recycling** via our back to the floor scheme. The ease of removal also allows the flooring to be **reused** if needed, reducing waste further. And with no adhesive used, the substrate remains clean meaning the flooring can be replaced **without time consuming and expensive subfloor preparation**.

All of Forbo's Fast Flooring solutions are produced in Europe using **100% renewable electricity**, and in facilities that are **certified to ISO14001**. They are also **all phthalate-free for healthier indoor environments** and many are available in natural stress-reducing designs, high LRVs (Light Reflectance Values) and are dementia friendly.

ADHESIVE FREE SOLUTIONS

AT A GLANCE FIND THE RIGHT FAST FLOORING FOR YOUR PROJECT

Modul'up T.E. **43T30572** | cement grey

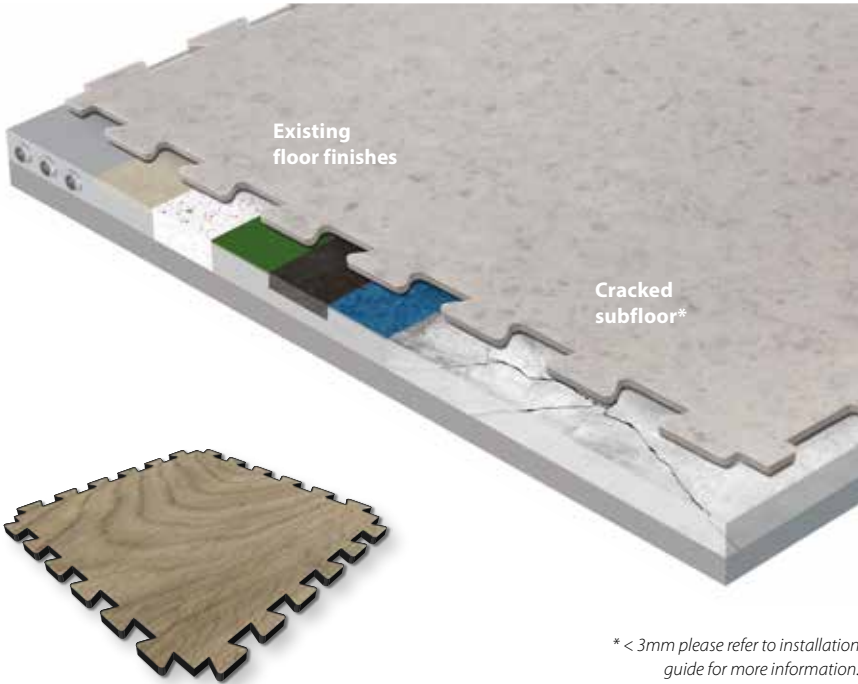

HEAVY DUTY – INSTALL OVER CRACKED OR DAMAGED SUBFLOORS

allura puzzle

Allura Puzzle has a unique puzzle tile shape with which strong connections can be made. The Puzzle tiles can be installed without adhesives, with the advantage that they also can be removed, reused and recycled.

- Format: **Tile**
- Adhesive Free: **Dovetail connectors**
- Subfloor type: **Existing, damaged or cracked**
- Ideal for use in: **Retail**
- Available in: **18 colourways**

For more information on this range scan the QR code.

* < 3mm please refer to installation guide for more information.

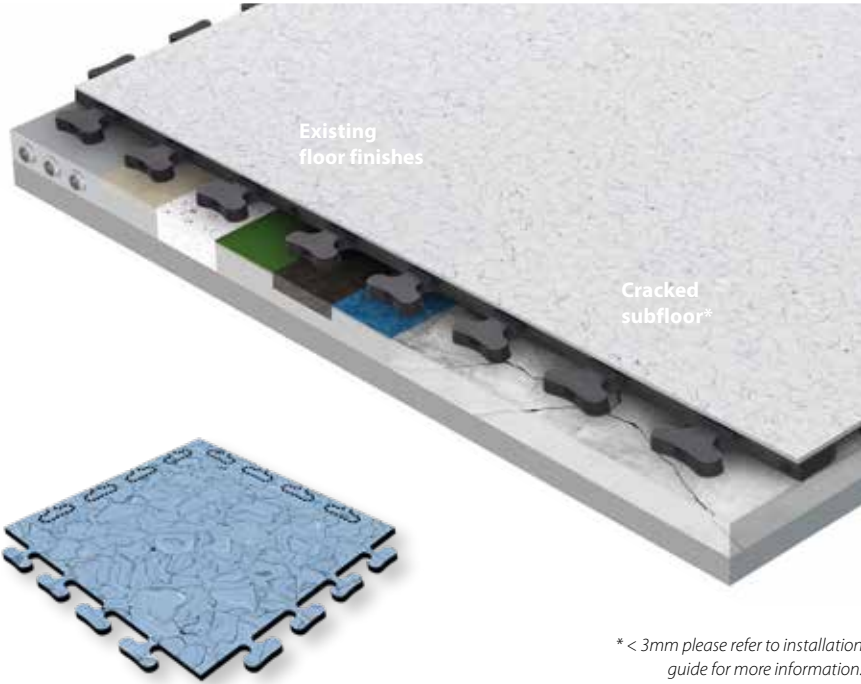

colorex® plus basic

Colorex Plus Basic is a heavy duty adhesive free floor system which provides excellent chemical resistance when conductivity is not required. The floor can also be repaired in case of heavy damage. Colorex Plus Basic is suitable for use in areas with high traffic needing intensive daily cleaning such as shops, stores and warehouses. Suitable when downtime, damp floors or poor sub floors are an issue.

- Format: **Tile**
- Adhesive Free: **Dovetail connectors**
- Subfloor type: **Existing, damaged or cracked**
- Ideal for use in: **Terminals, Temporary areas**
- Available in: **5 colourways**

For more information on this range scan the QR code.

* < 3mm please refer to installation guide for more information.

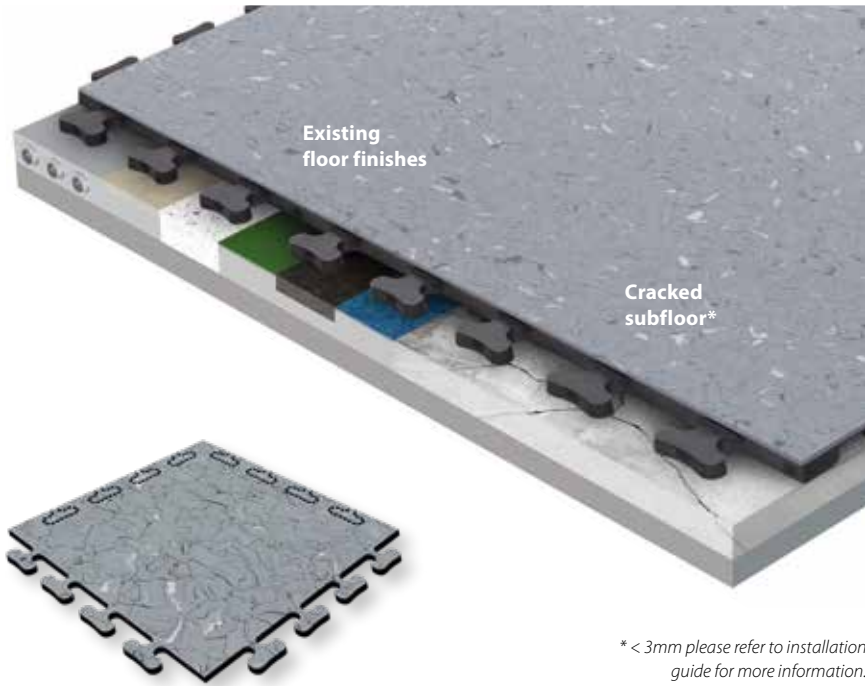

HEAVY DUTY – INSTALL OVER CRACKED OR DAMAGED SUBFLOORS

colorex® plus R10

Colorex Plus R10 is a heavy duty adhesive free floor system with a textured surface for enhanced slip resistance (R10). The surface structure improves safety when there is a risk of contamination of the floor for example through powder or water spillage. Colorex Plus R10 is suitable for use in production sites where no ESD functionality is required (manufacturing, life sciences).

- Format: **Tile**
- Adhesive Free: **Dovetail connection**
- Subfloor type: **Existing, damaged or cracked**
- Ideal for use in: **Manufacturing**
- Available in: **1 colourway**

For more information on this range scan the QR code.

* < 3mm please refer to installation guide for more information.

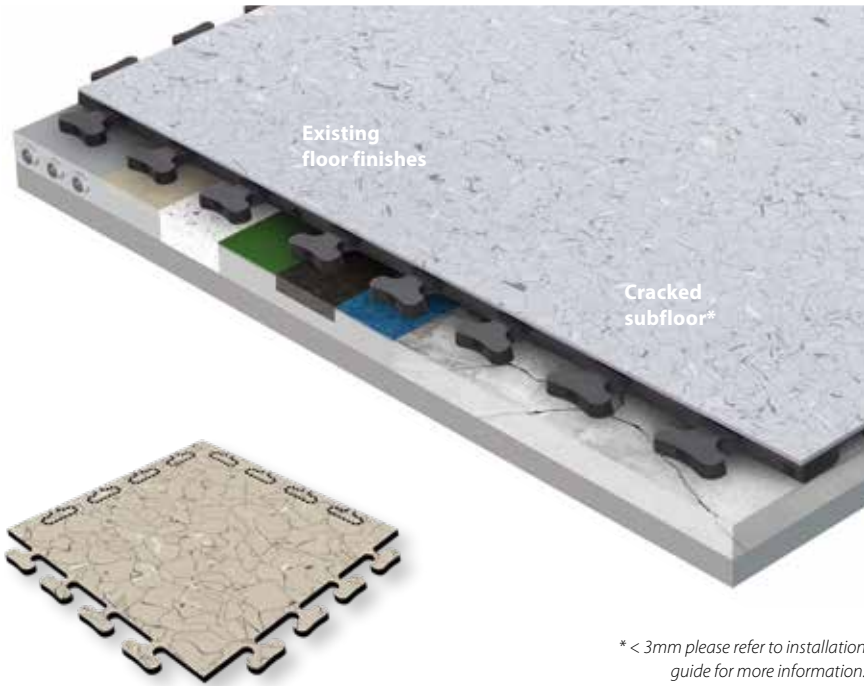

Colorex Plus R10 661007 | quartz

colorex® plus EC

Colorex Plus EC is a heavy duty adhesive free system. It is permanently conductive via the connection between tiles through the dovetail system and connected to earth with a copper strip. Colorex Plus EC performs regardless of the humidity level of the area. Compliant with IEC 61340-4-5 with appropriate ESD shoes.

- Format: **Tile**
- Adhesive Free: **Dovetail connection**
- Subfloor type: **Existing, damaged or cracked**
- Ideal for use in: **Cleanroom environments**
- Available in: **6 colourways**

For more information on this range scan the QR code.

* < 3mm please refer to installation guide for more information.

Colorex Plus EC 150201 | everest

WHY FORBO FAST FLOORING – CASE STUDIES

Edinburgh College

Products – **Modul'up adhesive-free vinyl & Tessera carpet tiles**

For the refurbishment of Edinburgh College's busiest campus, its FM team called upon Forbo Flooring Systems' Modul'up adhesive free sheet vinyl for its unique ability to be installed quickly and easily, while reducing downtime and disruption to day-to-day college life – as the floor covering could be walked on immediately after installation.

Based in the North of Edinburgh, Edinburgh College Granton Campus is the largest of the college's four campuses. A modern, practical and accessible building packed with state-of-the-art facilities, the building spans over 30,000 sqm of space across three floors and sees 1,800 students and staff come through its doors every day.

For more information on this case study scan the QR code.

Leeds Children's Hospital

Products – **Modul'up adhesive-free vinyl**

Two state-of-the-art hospital buildings are being built at Leeds General Infirmary and one will be a brand-new home for Leeds Children's Hospital. As part of the transition to the new spaces, Forbo worked with Leeds Hospitals Charity to supply a range of its floor coverings to help transform the existing tired entrance space of Leeds Children's Hospital.

To ensure that the works were completed safely and to minimise disruption to the staff and patients, Forbo recommended the use of its Modul'up flooring not only to speed up the installation process and keep downtime to a minimum, but also because it can be walked on immediately after installation. As such, 600m² of Forbo's Modul'up Compact flooring was installed.

To tie into the jungle theme of the entrance space, bright, zingy colours of Modul'up, including Yellow Doodle, Red Doodle, Green Grafito, Lime Topography, Grey and White Doodle and Steel Grey Topography, were installed in a tiger stripe pattern for the children to follow, drawing visitors into the space.

Ormskirk Hospital

Products – **Modul'up, Sphera & Coral**

Looking for a time and cost saving solution, Southport and Ormskirk NHS Hospital Trust chose Forbo Flooring Systems' Modul'up adhesive free sheet vinyl for the refurbishment of the Children's A&E and Children's Ward at Ormskirk District General Hospital. Easy and quick to install during out of hours, the 'fast fit' floor covering delivers outstanding dimensional stability and indentation resistance.

After nearly 30 years without refurbishment, the Paediatrics department at Ormskirk District General Hospital required a new lease of life to be injected into the building. With hospitals in operation around the clock by patients, visitors and staff, it was vital that the new flooring solution offered a combination of optimal performance benefits, whilst being quick and easy to install to minimise both disruption and downtime.

WHY FORBO FAST FLOORING – CASE STUDIES

Edeka Market Reske, Berlin

Products – **Allura Puzzle**

Since time is of the essence in renovation projects at the Edeka Group, a flooring solution was needed that could be laid directly on the existing floor particularly quickly, cleanly and quietly. At the same time, it was important that the floor blended harmoniously into the store design. Allura Puzzle, the Fast Flooring solution from Forbo Flooring, meets this requirement profile perfectly and was used in the Edeka Safa store in Berlin-Tegel in a striking stone look in the color Lead Stone.

Photography by Kostantin Gastmann.

The large-format tiles with dovetail joints are available in 18 authentic concrete and wood looks. In addition to the fast and uncomplicated application, the price-performance ratio was decisive for the decision in favor of Allura Puzzle. Since then, the product has proven itself with flying colors in the daily hustle and bustle of the capital's markets: extremely robust and easy to clean with every purchase. And should the floor show signs of damage here and there after years of use, individual elements can be easily replaced.

HMS Collingwood

Products – **Colorex Plus Basic**

HMS Collingwood is a major naval base at Fareham, Hampshire, which specialises in training Officers and Ratings in maritime warfare. Approximately 1,300m² of Forbo's patented Colorex Plus were installed in the new dining area of the building after previous flooring solutions were deemed unsuitable due to the poor condition of the building's sub-floor.

Forbo Flooring Systems has saved HMS Collingwood Naval training camp both time and money by supplying its innovative Colorex Plus flooring solution, eliminating the need for expensive sub floor preparation.

easyApotheke

Products – **Allura Puzzle**

There are 135 easyApotheken stores across Germany. There is also a branch in Münster, which is run by pharmacist Alexa Wenig-Gieselmann. The special approach of the group: to combine professional expertise with the greatest service orientation. The design of the premises is also striking; the store presents itself in newly designed rooms covering 170m², which were redesigned within seven weeks.

Decisive criteria in the choice of the new floor covering were, on the one hand, a quick installation and a hard-wearing material. Requirements that the Allura Puzzle Fast Flooring design floor confidently meets. The large-format tiles are applied directly to the existing floor without the use of adhesives. Both the dimensional stability and the technically sophisticated dovetail joints guarantee a perfectly even, highly resilient surface. In Münster, a dark concrete look was laid, which supports the striking appearance of the easyApotheke and also provides a visually calm base for the product range. "Thanks to its iridescent effect it also doesn't look so one-dimensional," says a delighted pharmacist Alexa Wenig-Gieselmann. "The floor is simply beautiful!"
